

PRE-PRESS AND PRESSROOM AUXILIARIES

ACQUA +

DESCRIPTION

Special additive to be used in addition to the water contained in the tanks of the automatic blanket washing systems.

Acqua+ prevents the formation of algae and fungi eliminating the bacteria.

MAIN FEATURES

Acqua+ is a product formulated to contribute efficiently to the cleaning of the blankets.

Acqua+, thanks to its special components, during the emulsion phase between solvent and water, prevents the formation of micro bacteria which, otherwise, lead to the growth of residues that may clog the blanket washing nozzles.

Acqua+ contains corrosion inhibitors.

ADVANTAGES BENEFITS

1. Effective against bacteria.
2. Improves the emulsion process between water and solvent.
3. Guarantees excellent cleaning of the blanket.
4. Avoids corrosion of the metallic parts.
5. **Reduced environmental impact**

INSTRUCTION FOR USE

Dose **Acqua+** directly in the water tank in the maximum percentage of 5% .
