

## AUXILIARIES

## ALCOHOL MIX

### DESCRIPTION

**Product substitute of Isopropyl Alcohol (IPA).**

Mixture of pure IPA.

### MAIN FEATURES

**ALCOHOL MIX** is a mixture of alcohol suitable for the preparation of the damping solution.

**ALCOHL MIX** is definitely more economic compared to pure IPA.

**ALCOHOL MIX** is able to reduce drastically the surface tension of the damping solution, thus facilitating the ink/water balance.

### ADVANTAGES BENEFITS

1. Elevate stability both of the product and of the damping solution
2. Minor impact on workers with reduction of characteristic IPA odor
3. Reduction of operative costs with positive outcomes on managerial costs
4. Sharper and more brilliant printing
5. Better ink setting
6. Elimination of ink build-ups on blankets and on damping rollers
7. **Reduced environmental impact**

### INSTRUCTIONS FOR USE

Dose following the instructions of the press constructors, or following the normal and usual dosing concentrations.
