

SILICONES

EMULSIFIER

DESCRIPTION

A non-ionic biodegradable surfactant with low odour.

Product to be added to Pure ROTOSIL to achieve the required performance on commercial heat-set presses..

MAIN FEATURES

Emulsifier is an additive for silicones. **Emulsifier** guarantees excellent product performances. **Emulsifier** has been designed to guarantee excellent results.

ADVANTAGES BENEFITS

1. **Optimizes Pure Rotosil.**
2. Outstanding wetting and detergency performances
3. Excellent formulation and handling properties
4. No aqueous gel range
5. Rapid dissolution even in cold water
6. Fast foam collapse
7. Compatibility with a wide range of solvents

INSTRUCTION FOR USE

Add to Pure ROTOSIL at 0.1%.
