

PRE-PRESS CHEMICALS

BLACK FINISHING GUM

DESCRIPTION

Black Finishing Gum is a solvent gum for cleaning and contemporaneous gumming of offset, conventional and CTP plates.

Black Finishing Gum is specific for the cleaning and storing of traditional and CTP plates even for long periods.

MAIN FEATURES

Black Finishing Gum is an emulsion of vegetal gums and refined solvents.

Black Finishing Gum reactivates the printing and nonprinting areas without damaging the photosensitive layer of diazo plate.

ADVANTAGES BENEFITS

1. Excellent plate protection
2. Does not damage the diazo resin
3. Excellent ink solvent power
4. Optimizes execution times
5. Lower environmental impact

INSTRUCTIONS FOR USE

Apply, with a soaked sponge, an even uniform layer of **Black Finishing Gum** on the entire plate surface, until the complete removal of the ink. Spread another small quantity of **Black Finishing Gum** and apply it with a soft cloth avoiding the accumulation of the product.
