

## PRE-PRESS CHEMICALS

## WHITE FINISHING GUM

### DESCRIPTION

**White Finishing Gum** is a solvent gum for cleaning and contemporaneous gumming of offset, conventional and CTP plates.

**White Finishing Gum** is specific for cleaning and storing of traditional and CTP plates even for long periods.

### MAIN FEATURES

**White Finishing Gum** is an emulsion of vegetal gums and refined solvents.

**White Finishing Gum** reactivates the printing and nonprinting areas without damaging the photosensitive layer of diazo plate.

### ADVANTAGES BENEFITS

1. Excellent plate protection
2. Does not damage the diazo resin
3. Excellent ink solvent power
4. Optimizes execution times
5. Lower environmental impact

### INSTRUCTIONS FOR USE

Apply, with a soaked sponge, an even uniform layer of **White Finishing Gum** on the entire plate surface, until the complete removal of the ink. Spread another small quantity of **White Finishing Gum** and apply it with a soft cloth avoiding the accumulation of the product.
