

FOUNTAIN SOLUTIONS

FS NMG 33 B

DESCRIPTION

Damping additive for COLD-SET web presses (newspaper).

NMG 33 B is a buffered universal additive indicated for all damping traditional and brush systems.

NMG 33 B is protected against formation of algae and bacteria.

NMG 33 B is suitable for medium - hard waters.

MAIN FEATURES

NMG 33 B guarantees to the printing process a high chromatic quality, even on natural papers like newspaper papers.

NMG 33 B contains special components that avoid the oxide deposit on the rollers improving significantly the balance speed between water and ink.

NMG 33 B keeps always clean and efficient the nozzles of the spraying systems.

ADVANTAGES BENEFITS

1. pH and conductivity values of the damping solution always stable in time
2. Drastic reduction of start-up times and of the number of waste copies
3. Better ink setting
4. Elimination of ink build ups on blankets and on damping rollers
5. Sharper and more brilliant printing
6. Lower environmental impact

INSTRUCTIONS FOR USE

Dose **NMG 33 B** at 2-3%.
