

## DESCRIPTION

### Damping additive for offset sheet-fed.

**FS SMF 64** is a new generation additive for high speed presses.

Thanks to the combination of the dynamic surfactants, the performances obtained on the prints are excellent.

**FS SMF 64** works extremely well even with lower IPA quantities.

## MAIN FEATURES

**FS SMF 64** gives to the damping solution high stability of pH and conductivity values, maintaining at the same time its efficiency. Specific components do not allow oxide deposits on the rollers, thus avoiding the continuous use of de-oxidizers on rollers. **FS SMF 64** improves the ink setting increasing the safety in high piles even at high speeds.

Recommended for medium-soft treated waters.

## ADVANTAGES BENEFITS

1. Damping solution efficient and stable over time, with consequent reduction of regeneration costs
2. Total elimination of oxide from rollers and blankets
3. Strong reduction of waste copies and of relative operating costs
4. Elimination of ink build ups on blankets and on damping rollers
5. Sharper and more brilliant printing.
6. Lower environmental impact

## INSTRUCTION FOR USE

Dilute **FS SMF 64** in proportion of 2-3% depending on the water quality.
