

PRE-PRESS AND PRESSROOM AUXILIARIES

HARDENER 1.0

DESCRIPTION

Hardener 1.0 is a concentrated solutions of salts for osmotic systems.

Hardener 1.0, thanks to its special formulation, restores the original values of hardness and conductivity of the water treated with osmosis.

MAIN FEATURES

Hardener 1.0, thanks to the combination of the chosen salts, brings the values of the water previously treated with osmosis to the right values for printing. The value of the total hardness is around 8°- 10° D.

ADVANTAGES BENEFITS

1. Drastic reduction of start-up times
2. Sharper and more brilliant printing
3. Total absence of oxide from rollers and blankets
4. pH and conductivity values always stable
5. Elimination of ink build ups on blankets and on damping rollers
6. Lower environmental impact

INSTRUCTION FOR USE

Apply **Hardener 1.0** as it is thorough the dosing systems of the finishing area. To remove Hardener, use the product **Glue Cleaner**.
