

PRE-PRESS AND PRESSROOM AUXILIARIES

NO STOP

DESCRIPTION

NO STOP is a lubricant for ink rollers.

MAIN FEATURES

NO STOP is a paraffin based liquid with high lubricating power that avoids the overheating and the consequent deterioration of the printing rollers in the running "dry" phase.

NO STOP is used to preserve the ink rollers in the unused offset printing press castles.

ADVANTAGES BENEFITS

1. Excellent protective power
2. Keeps the rubber rollers in perfect conditions
3. Does not damage the plates
4. Low odor
5. Safe in use
6. **Reduced environmental impact**

INSTRUCTIONS FOR USE

Pour a small quantity of **NO STOP** directly on the ink rollers.
If necessary, add more product.

To remove the product, wash with solvent and eventually degrease with a product called *DEGREASER*.
