

PRE-PRESS AND PRESSROOM AUXILIARIES

PURE ROTOSIL

DESCRIPTION

Pure ROTOSIL is a product for use in automatic silicone systems installed on Heat-Set web offset presses combined with special equipment that optimizes the performance of this product.

Pure ROTOSIL, thanks to its characteristics, restores the original moisture content of the paper after the thermal shock caused by the passage between the oven and the cooling calenders. It also protects the print from marks and scratches. It contains antistatic components.

MAIN FEATURES

Pure ROTOSIL is a high purity product.

Pure ROTOSIL protects the printout on all contact points where the paper band passes during the folding phase.
