

PRE-PRESS CHEMICALS

SYNTHETIC GUM

DESCRIPTION

Solution based on synthetic gums for the protection of offset CTP and traditional plates.

MAIN FEATURES

Synthetic Gum has, as a main characteristic, the ability to protect over time the plate surface avoiding the oxidization, which is characteristic of untreated plates. **Synthetic Gum** is formulated with new generation synthetic gums that do not generate algae or molds. **Synthetic Gum** has an excellent fluidity that allows very thin and even spreading on the entire plate surface. **Synthetic Gum** is ideal to be used manually or with automatic washing systems.

ADVANTAGES BENEFITS

1. Excellent plate protection
2. Maintains optimal hygienic conditions.
3. Optimal spreading
4. Safe and easy to use
5. Low emission of characteristic odor
6. Lower environmental impact

INSTRUCTIONS FOR USE

Spread a thin and uniform layer of **Synthetic Gum** with a soaked sponge over the entire plate surface. For use with the automatic washing systems, follow the instructions provided by the manufacturer.
